

David Keith Talbert –

Is a Senior Project Manager with more than 27 years' experience in overseeing NCDOT utility coordination projects including the planning and coordination of project work, and the ability to negotiate and develop contract documents for highway projects, and utility owner agreements. His expertise includes the development of Utility Relocation Agreements and acquiring Encroachment Agreements from utility owners; development of utility relocation strategies and providing coordination and relocation services to accomplish removal, relocation, and modification of utility facilities (gas, electric, telecommunication, water/wastewater) that were impacted by the highway improvement projects.

As the former NCDOT Senior Division Utility Coordinator 10 and Division 9 Utility Coordinator (2017-2021), Mr. Talbert managed utility coordination, DDC and DMSIP project construction plans and reviewed and approved Utility Relocation Agreements and/or Encroachment Agreements. along with reviewing bridge replacement plans for utility conflicts to ensure the removal.

For 19 years, David worked for CTC and Windstream as an outside plant telecom engineer working in the City of Concord and the surrounding areas.

US Navy veteran serving around the world as a Fighting Seabee and still to this day I carry out the motto from the "BEES" the phrase CAN DO.

Currently the Mecklenburg UCC co-chair.
